# TRAFFIC COMMANDER

TRAFFIC COMMANDER – Software-download click on link below.

[MCS-Matrix Editor - Install.zip](#)

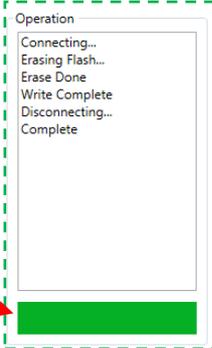

ACC-370 – Data cable - USB-A Male to USB-B Mini Male - 2m Lead, also required.

1. Install the Traffic Commander Display software on a suitable Laptop, this will allow configuration within the vehicle without product removal.
2. Carefully remove the Top section of the Controller shroud, this will reveal the USB-B connection port.
3. Using the cable ACC-370 supplied with software pack connect both Controller & PC.
4. Open software and select the device shown in 'Connected Devices' this will provide all build / serial data.
5. You can then create a new .mcd file within the software following procedures below.

Once you are happy with the 'Messages' select 'Write' this will connect to the device highlighted, erase current file and write the new format.

Status Bar  
Process Complete when indicated with a solid Green Bar.

### Traffic Commander TEXT Orientation.

The Traffic Commander comes as Flip-down as standard. The orientation of the Text for the unit attached to the G4 controller can be made following the instructions below. Press "Return (Green)" and "Down" at the same time and hold, after 3 seconds the device will enter the settings screen.

Scroll down 1 for Matrix Display and press "Return (Green)". The standard Orientation will indicate "Down" to change setting "Up" press the "Return (Green)" button, this will prompt the down arrow as indicated.

Press "Down" once to change to "Up" now press "Return (Green)" to confirm. This setting makes immediate changes to the text orientation to the unit currently connected to the G4 controller, press "Red" button to exit. **Note:** this setting is stored on the Traffic Commander only and not the G4 controller.
