# AVON FIRE & RESCUE SERVICE

Brand New Electric Hyundai Ioniq Fleet Utilises Standby RSG Lightbars as Part of Carbon Neutral Goal

Avon Fire & Rescue Service provides emergency services to Bath & North East Somerset, Bristol, North Somerset and South Gloucestershire. Within this area they operate 69 front-line fire appliances across more than 20 stations as well as 70 ancillary vehicles, a hovercraft and 4 boats.

The service was the first to sign the Bristol 'One City' Climate Change Ask and pledge carbon neutrality by 2030. Following the implementation of Clean Air Zones in Bath and Bristol, they have also installed solar panels, EV charging points, air source heat pumps and are planning to trial electric / hybrid fire engines to meet the goals outlined in their Environmental Strategy 2020-2030.

As part of their ongoing commitment to 'going green', the team has introduced a fleet of nine new Hyundai Ioniq 5 electric pool and station cars. Having been a proud supplier of Avon Fire & Rescue Service for more than 20 years, Standby RSG were excited to supply the Stellar LED Lightbar for use in this project. The Standby RSG team recently paid a visit to their Avonmouth branch to take a look at one of these new vehicles.

The team was met by Transport Stores Officer Tony Roberts who explained that their choice of lightbar was down to the Stellar being the ideal product at a fantastic price. The configuration was made to a length of 36" and featured blue & white LEDs. Whilst there the team also had the opportunity to demonstrate a range of other Standby RSG products and discuss Avon Fire & Rescue Service's ongoing needs.

To stay up to date with Avon Fire & Rescue Service's journey to carbon neutral, visit their website [here](#) and find them on [Facebook](#), [Twitter](#) and [Instagram](#) @avonfirerescue and [LinkedIn](#) @avon-fire-&-rescue-service.
