

L52 Adjustable Window Shield

DATA SHEET

L52 Adjustable Window Shield

Large Shield: 49500056 Small Shield: 49500057

Overview

The L52 Adjustable Window Shield is designed to fit the majority of vehicle windshields, ensuring a seamless installation for versatile applications.

Key Features

- Two Housing Sizes: Choose from two sizes to best match your vehicle's requirements.
- Adjustable Mounting Bracket: The internal bracket allows for precise adjustment, ensuring optimal light output positioning for any vehicle.
- Minimised Interior Light Emission: The outer housing is specially crafted to reduce unwanted light spillage into the vehicle's interior, improving driver comfort and focus.

Simple Installation

- Mounting Made Easy: Attach the shield to your windscreen with the included double-sided adhesive tape.
- Customizable Angle: Fine-tune the mounting bracket angle with the side screws to achieve your preferred positioning.

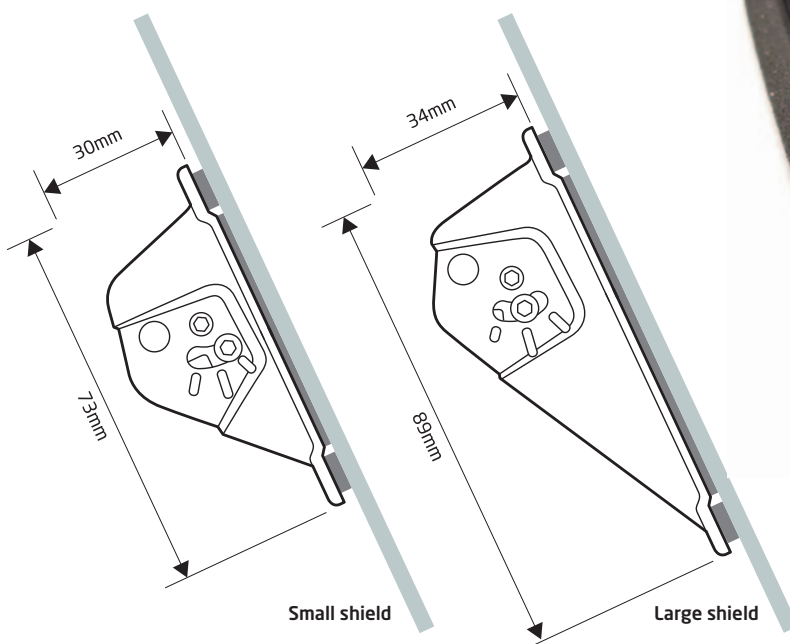

The L52 Adjustable Window Shield combines flexibility and functionality to meet the demands of modern vehicle lighting solutions.

(sold separately)

Mounting Instructions

1. Release the inner mounting bracket from the housing and secure the L52 LED module in place with the screws provided.
2. Feed the power cable through the one of the holes on each end of the unit and reassemble.
3. Adjust the lamp with the screws on side of the unit ensuring they are tightened so the lamp doesn't lose its position over time.
4. Clean the window with 50:50 mixture of isopropyl alcohol and water.
5. Remove the protective film to expose the adhesive tape and press the unit to the screen and holding in position for 30 seconds.
